

2024 PRESENTATION

2024 PRESENTATION

ABOUT US

Founded in 2014 by two French engineers with international experience in the industrial sector, INNOVA Process proposes its services to the foreign industrial equipment manufacturers. INNOVA Process takes care of piping design, electrical and automation design, equipment certification, international transportation, local delivery, installation on site, mechanical and electrical connections, as well as a selection of other specific works for the industrial facilities. INNOVA Process aims at establishing long-term relationships with the industrial equipment manufacturers by establishing itself as their local partner in Russia and CIS.

SERVICES

①

Mechanical and electrical design

- 1.1 Design of piping network and supporting structures
- 1.2 Design of electrical systems and cubicles
- 1.3 Design of automation and supervision systems

SERVICES

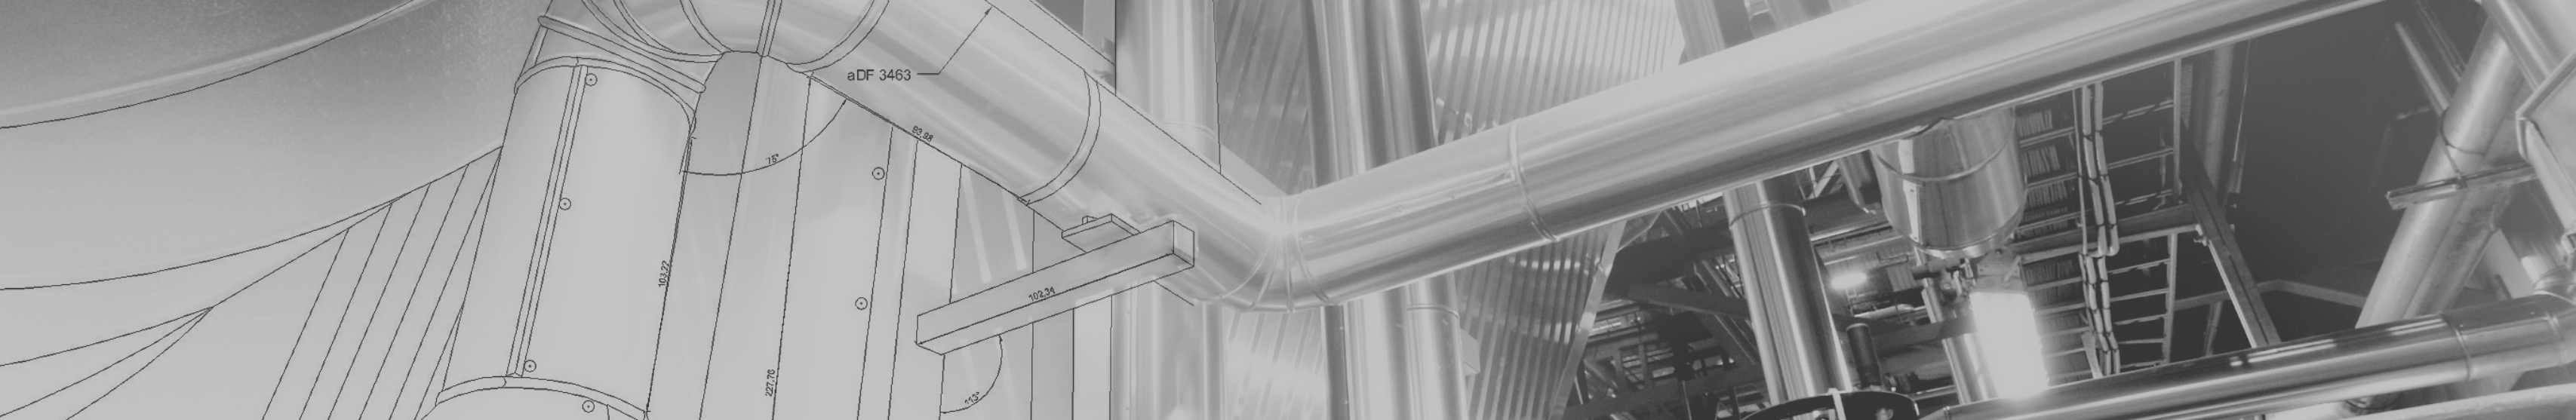

Importation of technological equipment

2.1 Certification

2.2 Import and custom clearance

2.3 International freight and local transportation

SERVICES

③

Installation of technological equipment/skids

- 3.1 Delivery on site, unloading of trucks, unpacking, installation of equipment
- 3.2 Connection of equipment to utilities: hot water, chilled water, raw water, softened water, steam, electricity, compressed air
- 3.3 Connection of equipment/skids to each other, stainless steel piping, supports, cable trays, wiring, electrical connections
- 3.4 Thermal insulation of pipework and ductwork, rubber foam or mineral wool with stainless steel or isoxal sheet finishing
- 3.5 Design, supply and erection on site of stainless steel walkways

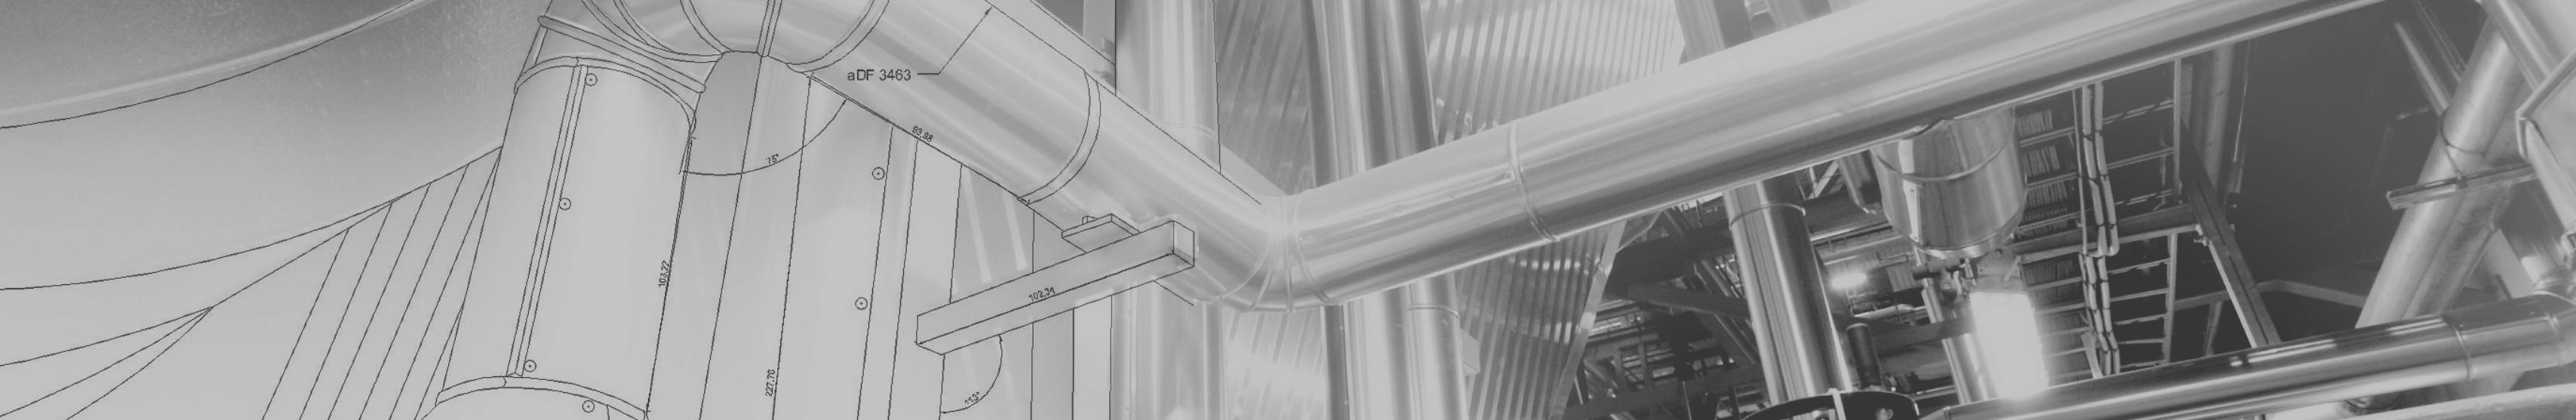

SERVICES

4

Erection of positive and negative cooling chambers

- 4.1 Installation of sandwich panel cooling chambers : walls and ceilings in mineral wool, PUR, PIR, installation of sliding and pivot doors
- 4.2 Installation of cooling equipment : evaporators, compressors and condensers
- 4.3 Installation of pipework for direct expansion and chilled water system, condensate drainage

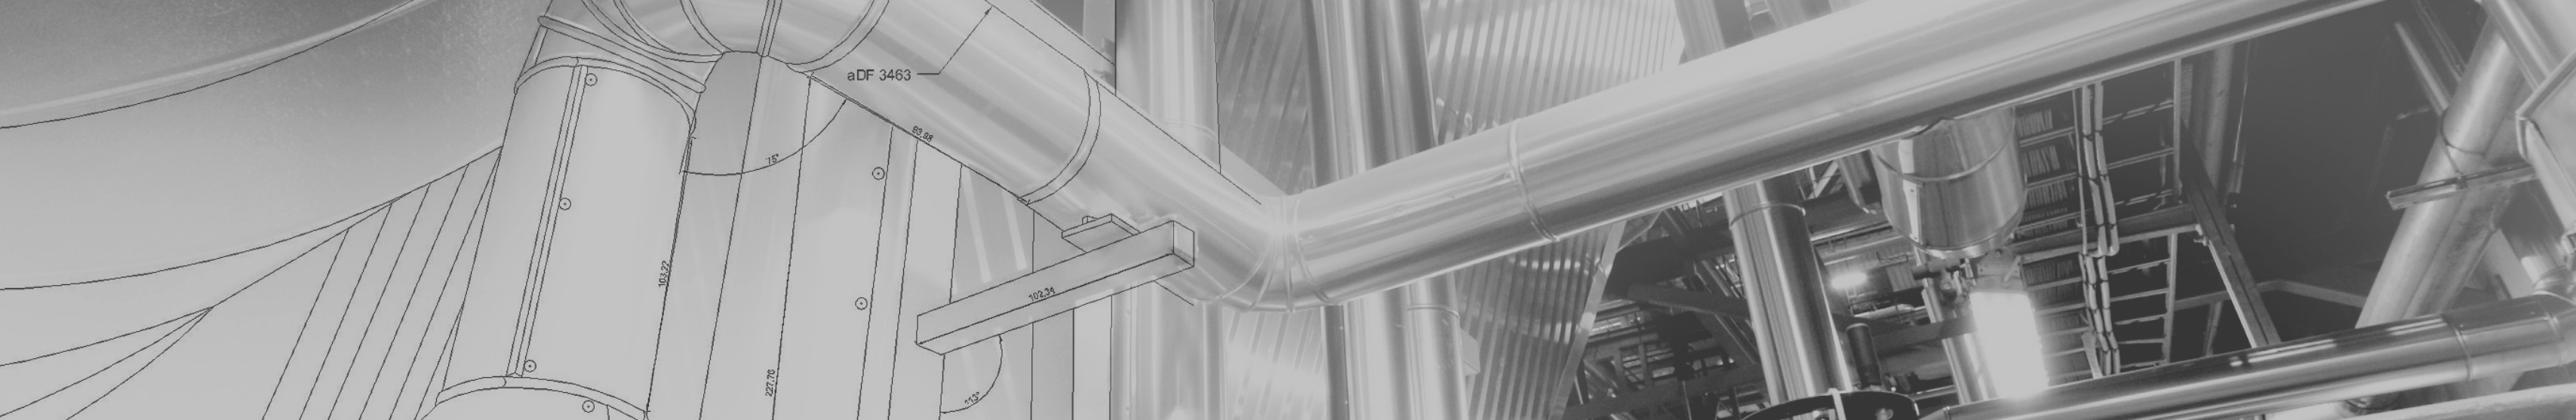

SERVICES

5

Floor finishing

- 5.1 Installation of anti-acid industrial tiles
- 5.2 Installation of anti-acid industrial resin floors with mineral load
- 5.3 Installation of stainless steel floor drains and floor grills

PROJECTS

①

Industrial bakery

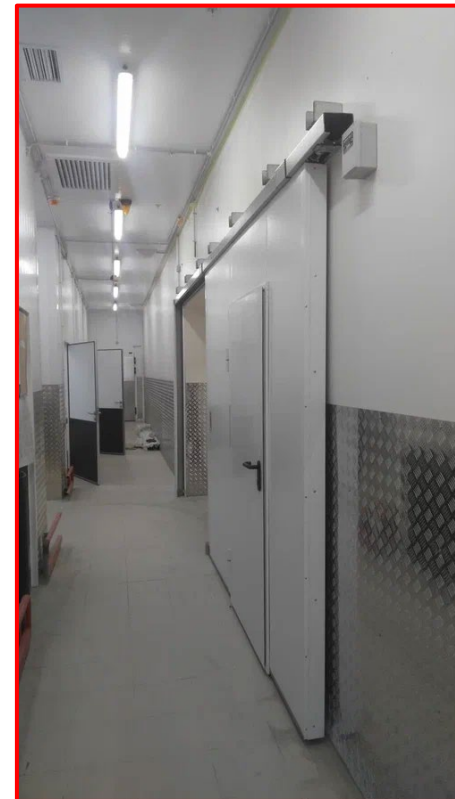

- ☐ Flour silo installation
- ☐ Pneumatic flour conveyor installation
- ☐ Equipment installation (malaxers, fermentation chambers, oven, steam oven,...)
- ☐ Installation of cooling and freezing chambers (insulation panels, evaporators, piping network, thermal insulation)
- ☐ Installation of smoke exhaust for the oven (stainless steel double wall duct)
- ☐ Utility connections (0.4kV, water, smoke exhaust, condensate,...)
- ☐ Earthing connection of equipment
- ☐ Testing and commissioning under equipment manufacturer's specialist supervision

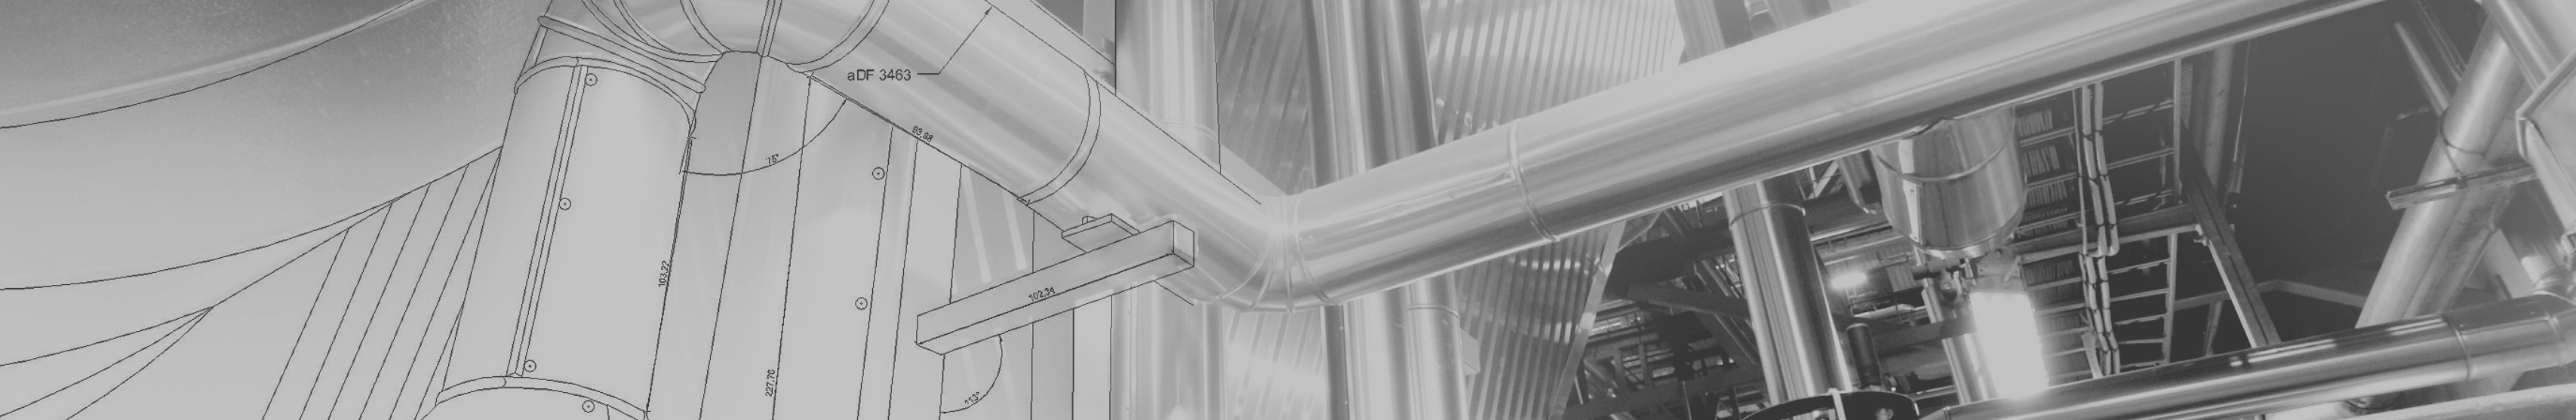

PROJECTS

1

Industrial bakery

PROJECTS

②

Boiler Installation

- ☐ Equipment installation (VIESSMANN, BOSCH)
- ☐ Hot water piping works (black steel pipes, mineral wool thermal insulation, stainless steel sheet covering)
- ☐ Utility connections
- ☐ Pipe pressure testing
- ☐ Testing and commissioning under supervisor's assistance

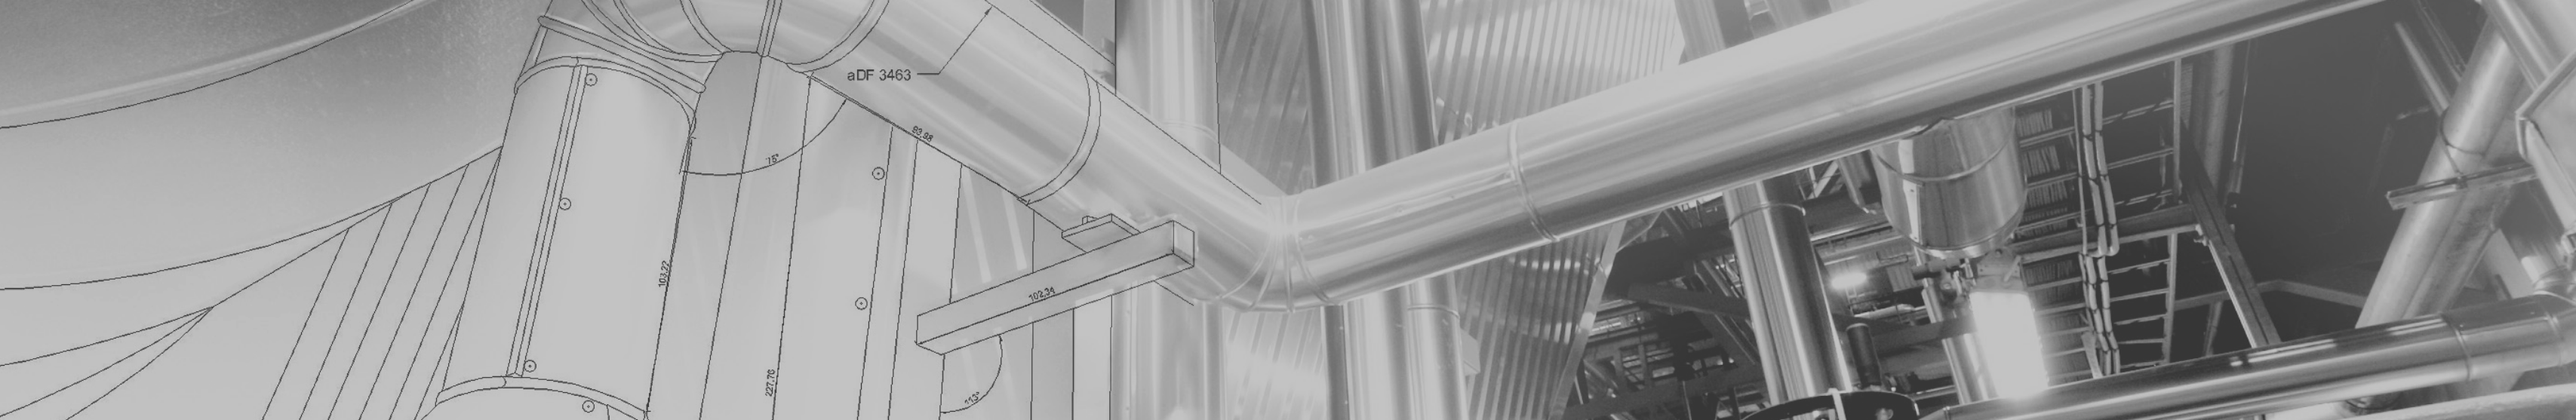

PROJECTS

2

Boiler Installation

PROJECTS

③

Technological Waste Water Treatment Plants (Biological Waste Water)

- ☐ Equipment installation (VEOLIA, HYDROTECH, Russian manufacturers)
- ☐ Stainless steel piping works
- ☐ Installation of steel structure supports
- ☐ Internal cabling (power and signal cables)
- ☐ Glass steel tank installation (3000m³)
- ☐ Utility connections (tie-in points) : 0.4kV, incoming water, steam,...

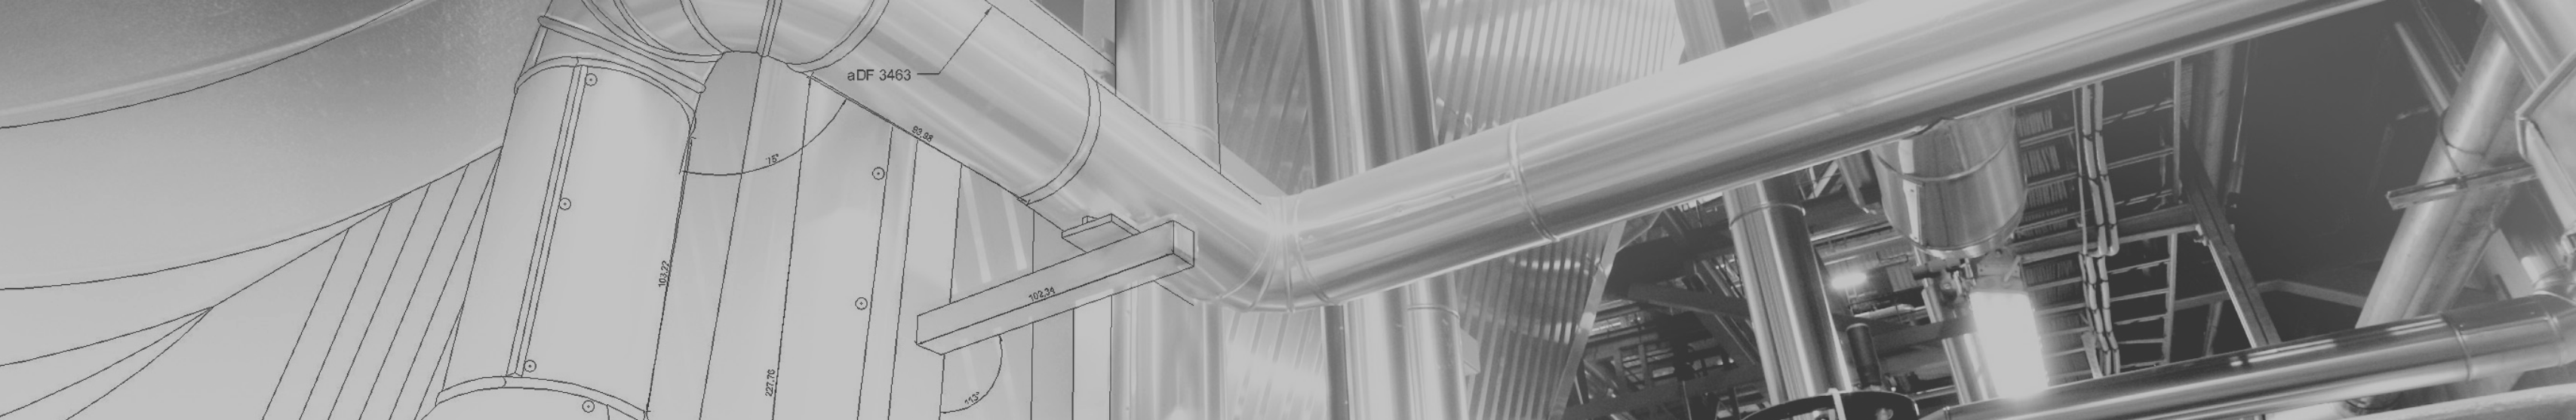

PROJECTS

3

Technological Waste Water Treatment Plants (Biological Waste Water)

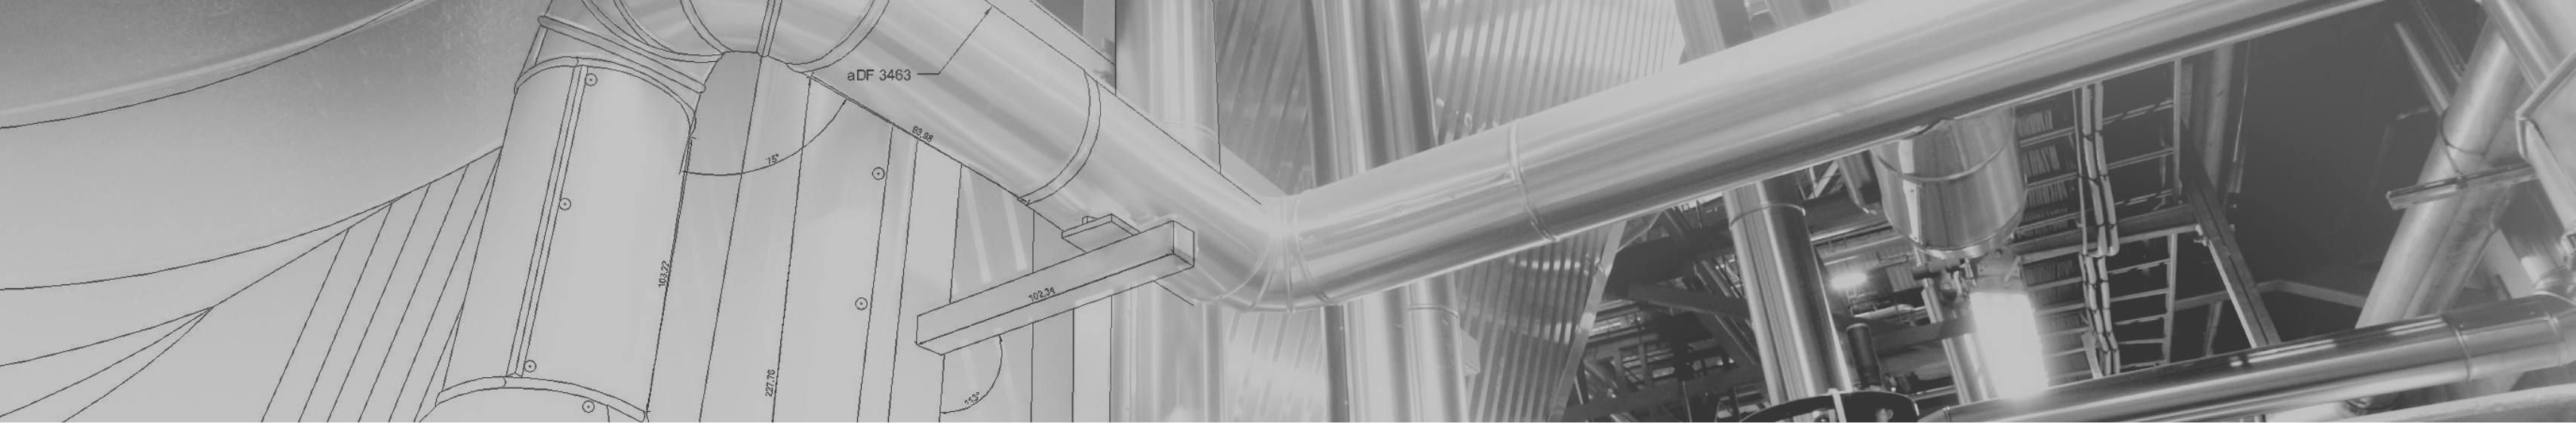

PROJECTS

④

Water Preparation Station

- ☐ Equipment installation
- ☐ Piping works (stainless steel)
- ☐ Utility connections and earthing
- ☐ Tank installation

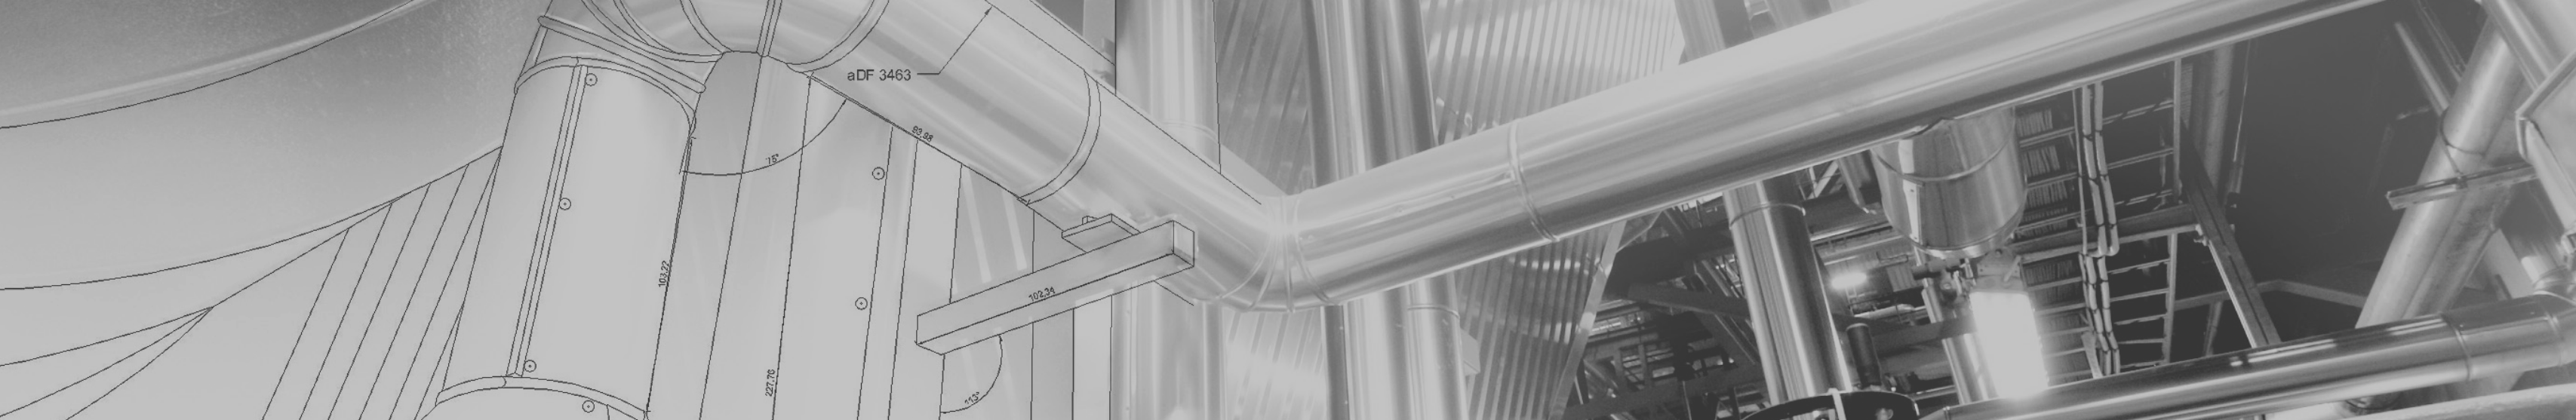

PROJECTS

4

Water Preparation Station

PROJECTS

5

Compressed air distribution systems

- ☐ Compressor installation
- ☐ Manifold installation and supports
- ☐ Piping works (stainless steel)
- ☐ Installation of distribution system inside the factory
- ☐ Pipe pressure testing
- ☐ Start up works with supervisor's assistance

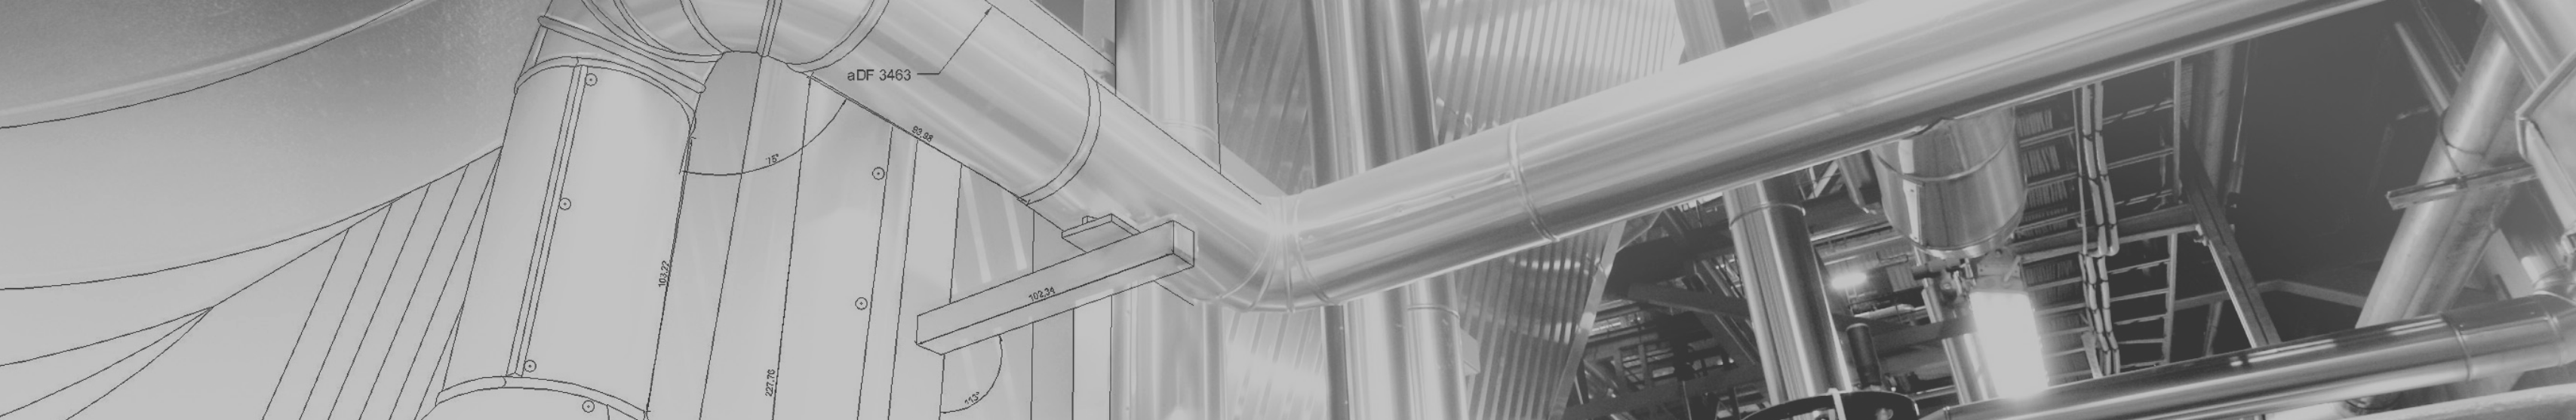

PROJECTS

5

Compressed air distribution systems

PROJECTS

⑥

Stainless steel catwalks and walkways

- ☐ Design of stainless steel catwalks and walkways
- ☐ Manufacturing of walkways
- ☐ Installation of walkways

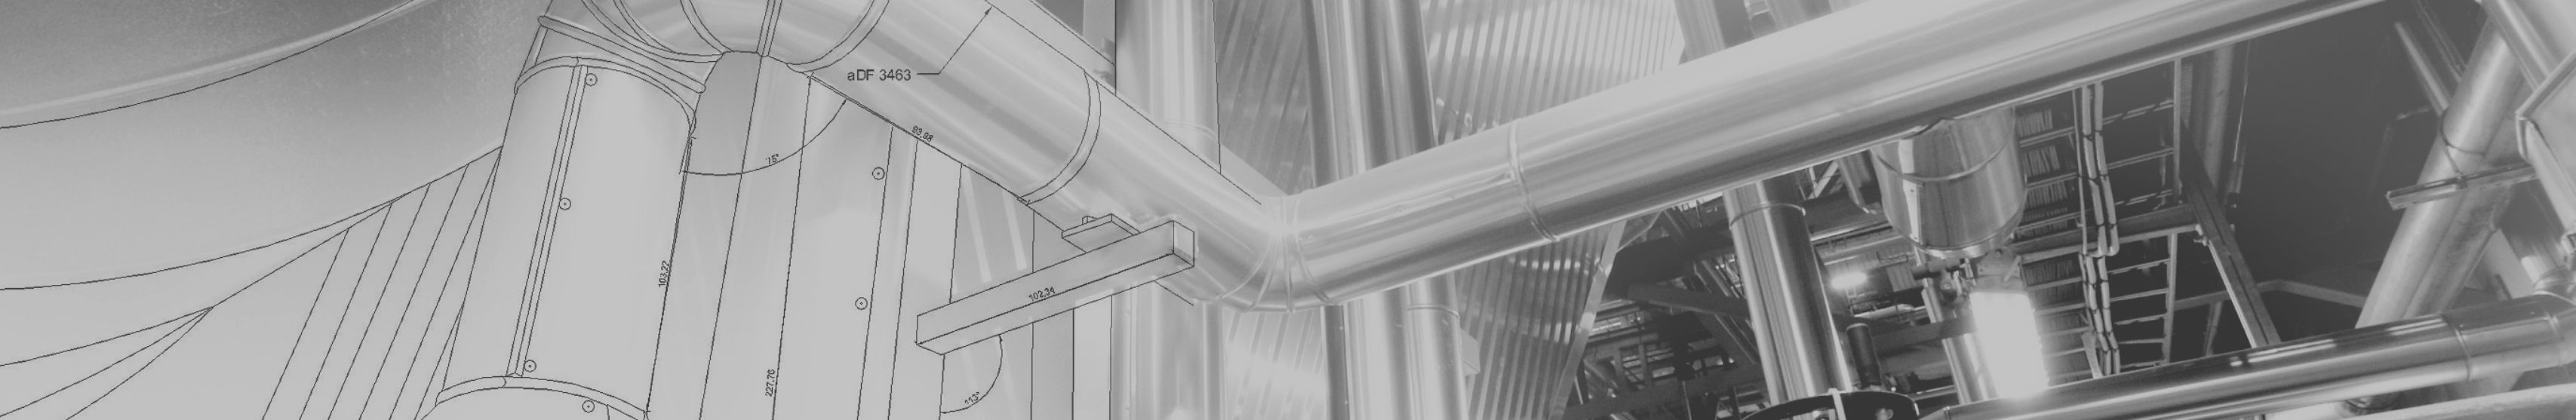

PROJECTS

6

Stainless steel catwalks and walkways

PROJECTS

Installation of technological equipment

- ☐ Delivery on site, unloading of trucks, unpacking, installation of equipment
- ☐ Connection of equipment to utilities: hot water, chilled water, raw water, softened water, steam, electricity, compressed air
- ☐ Connection of equipment

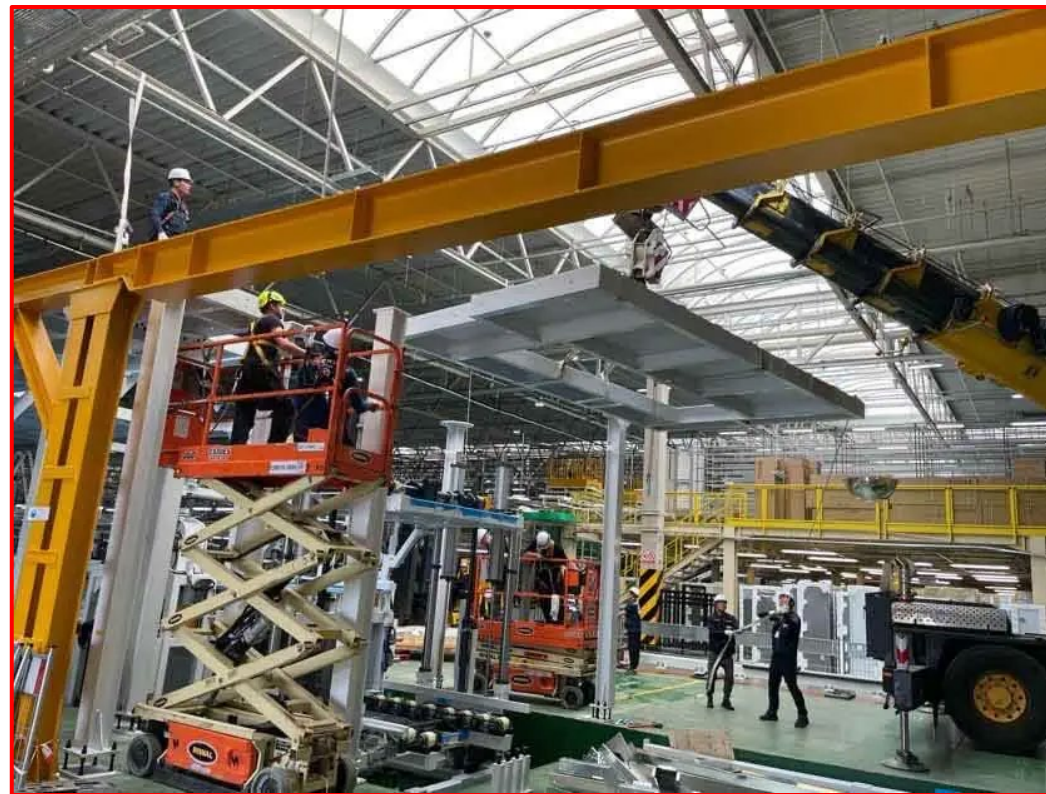

PROJECTS

7

Installation of technological equipment
